Examples of growth stimulation without fertilizer, soils loosen up deeper and soil compaction disappears. The key is healthy soil organisms as they can release all the required nutrients and supply it to the plants in exchange for sugars.

Rose tree

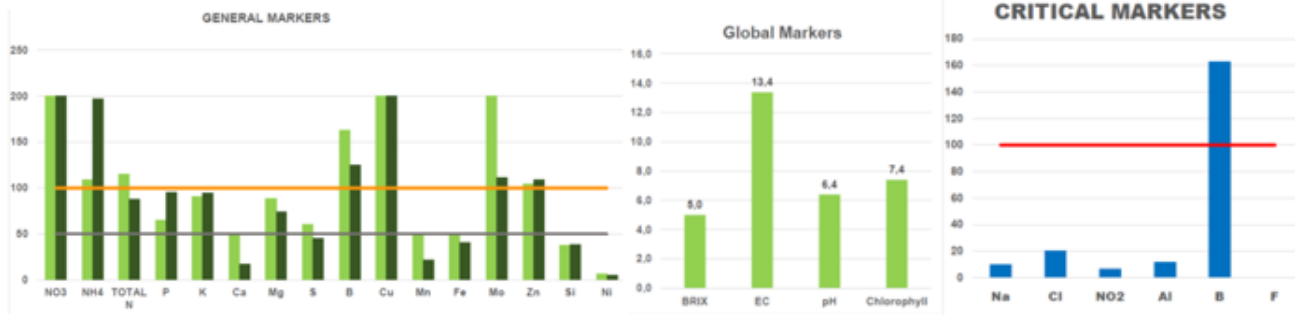

Bananas in Pongola

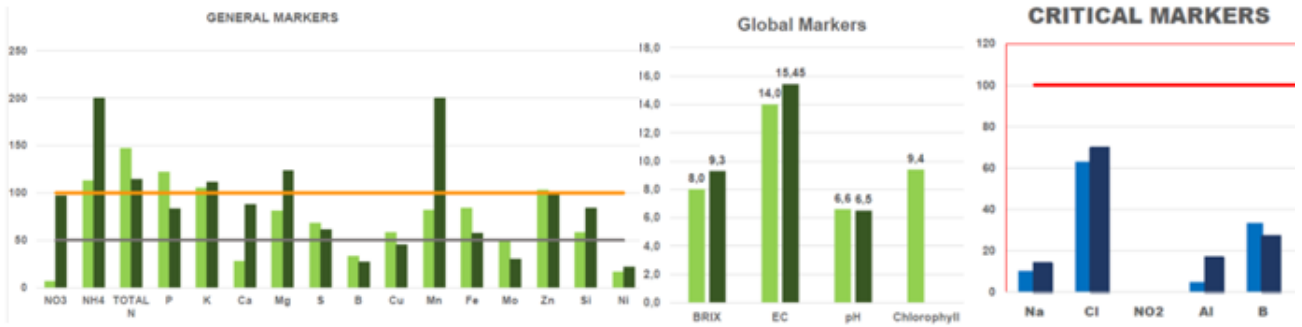

Yield is determined by **Soil Quality** and compost is the secret, healthy soils produce healthy plants that produce healthy fruit that is nutritious and tasty and they fetch good prices.

Frequencies supply all 72 minerals to the plant as well as vitamins for best quality and production. With the help of plant sap analyses the condition of the soil can be determined, frequencies proved to be extremely successful in soil improvement and can replenish any shortage in the plants within days. Plant sap analyses proved the superior results of frequencies compared to fertilizer.

Potatoes Control untreated (fertilizers only)

Potatoes Frequency treated, note the better mineral balance, higher Brix and chlorophyll levels.
